

FLiRT Clinical Trial - Call For Patients:

The Research teams at Duke, NYU, UCSD and Stanford are looking for patients with recurrent glioma who have previously been treated with Temodar (TMZ), to join the FLiRT Clinical Trial.

Patient Qualifications for FLiRT Clinical Trial:

- Patient currently has recurrent glioma
- Patient has previously been treated with Temodar (TMZ)
- Patient has not experienced progression for at least 3 months after completing chemotherapy
- Patient is about to have a biopsy or resection of their recurrent disease

If this sounds like you or someone you know, patient may be eligible to participate in the FLiRT Clinical Trial. Please get in touch as soon as possible by:

Calling: 919-684-5301

or emailing: becky@knoxmartinfoundation.org

You will receive a call back from the Duke Brain Tumor Center within 48 hours

Patient eligibility will be determined at the discretion of the FLiRT Clinical Trial research teams.
